

# compliguard protect™

## Information Governance and Confidentiality for Law Firms

For today's digital law firm, securing information access across all firm personnel, offices and systems is no easy task.

Traditional manual approaches that rely on fee earners and support staff to enforce confidentiality are no longer sufficient to satisfy clients' needs and regulatory requirements.

Approaches requiring IT departments to manually limit access control in various systems simply cannot keep up with the fast-paced rhythm of today's business, leaving too much room for errors and omissions.

Firms require a system that protects sensitive information and reduces risk exposure by establishing, maintaining, monitoring and updating security and confidentiality settings from a single point of entry, to consistently secure content across multiple systems, in real-time.

**compliguard protect** is the next-generation information governance and confidentiality application, designed to effectively meet and exceed today's complex requirements for protecting sensitive information at law firms.

**compliguard protect** provides firms with a comprehensive approach to securing sensitive content with information barriers across all mission-critical systems and applications.

**compliguard protect** delivers protection far beyond the boundaries of the document management repositories, securing all information across all critical business systems including records management, CRM, time & billing, new business intake, time entry and Microsoft SharePoint.

**compliguard protect** enables firms to monitor unusual activity within the firm, allowing IT and the business to proactively eliminate risk.

## Information Governance and Confidentiality for Law Firms

### Secure Information Effortlessly

Avoid compliance violations with great ease, leverage comprehensive security and confidentiality capabilities to secure sensitive information.

Activity - Document Ma

### Monitor Unusual Activity with Ease

Anticipate impending lateral departures and receive alerts when individuals exceed typical activity levels with firm information.

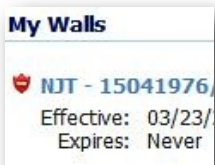

### Automatic Self-Monitoring System

Stop potential breaches before they occur by automating barrier creation, dynamic updates of new timekeepers and new matters, and reversal of manual security changes.

### Comply with Global Ethics Rules & Regulations

Avoid penalties and ensure firm-wide compliance of Market Abuse Directive, Solicitors' Code of Conduct, HIPAA HITECH and more.

### Intuitive and Non-intrusive for Lawyers

SharePoint-based lawyer portal provides secure self-service for lawyers and staff streamlining access to new barrier requests, notifications, barrier status checks, and more.

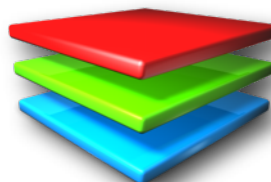

### Scale with Speed & Efficiency

Deploy in weeks with out-of-the box application integrations, barrier templates and wizards. Protect and monitor more than 15 million documents per server.

### Most Comprehensive Security Options

Multiple barrier types (exclusionary, multi-sided, inclusionary, limited access, tiered) to meet every confidentiality requirement. Plus, custom security at the folder level. Can even secure folders on file systems.

### Reporting, Audit Trail, Notifications

Leverage out-of-the-box reports, alerts and notifications. Create custom alerts and notifications with great ease. Leverage enterprise-strength reporting capabilities based on Crystal Reports.

“compliguard **protect** sets the standard for comprehensive protection of sensitive information. It has far surpassed our expectations.” AmLaw 100 Firm.
